
Travel Without Tension App – Documentation

💡 App Ka Aim – Seedhapan with Swag

Dekho bhai, yeh app bana hi un logon ke liye hai jo travel toh karte hain public transport se, lekin dil mein full anxiety hoti hai —

“Station miss na ho jaaye”,

“Koi lene aaya ki nahi?”,

“Bhai, call karna yaad rahega ya neend mein utar jaunga wrong stop pe?”

Bas, tension lene ka kaam humne le liya hai.

User location dega, destination dega — hum background mein bhoot ki tarah peeche peeche challenge.

Aur jaise hi destination paas aayega, ek proper call jayega — Twilio ke through — woh bhi ussi message ke saath jo tu chahta hai.

🚀 Features Breakdown – Apni Hindi Mein, Tere Hi Style Mein

1. Login / Signup

Normal hai bhai.

Mobile number ya email daalo, password ya OTP se login karo.

Fatafat trip planning shuru.

2. Settings – Permanent Wale Setups

Yeh section sirf un cheezon ke liye hai jo **har trip mein same** rehti hai:

- 🔑 Twilio tokens (Account SID, Auth Token)
- 📞 Apna verified Twilio phone number — yeh clearly mention karenge: **“Is number ko Twilio se verify kar ke daalna hai, warna call nahi chalega boss.”**
- 🗺️ Default “kitne km pe call chahiye” before reaching destination
- 🗣️ Call ka default message (jo har trip mein chalega, unless user change kare)
- ✅ Notifications chahiye ya nahi (**Ab yeh sirf ek case mein use hoga**):
 - Agar user kisi trip mein saman yaad dilane wali option ON kare, toh call ke baad ek notification jayega bhi — warna nahi.

🤖 **Note:** Pickup ya destination pe kisi ko call karwana — **har trip pe poocha jaayega**, setting mein uska option nahi hoga.

3. Trip Planning – Hero Wala Section

Jab bhi banda trip start karega, yeh details maangege:

- 🎯 Destination location
- 🧠 Optional toggles:
 - 🛍️ **Saman yaad dilana hai?** (e.g., “Bag le lena bhai”)
 - 📞 **Call someone to pick you up?** (user will enter name/number)
 - 📠 **Call someone after reaching?** (user will enter name/number)
 - 📍 **Change default distance for this trip?** (optional override)

Trip specific info — aaj ka mood kya hai, uske hisaab se.

4. Pickup & Arrival Call – Bhai, Dost, Mummy Papa Wale Features

- User **ek ya dono toggle ON kar sakta hai**:
 - 📞 **Call for pickup:** Bhai ya dost ko call jayega (user se number lenge us time)
 - 🎉 **Call after reaching:** Mummy ya papa ko call jayega (ya jo number user de)
 - Har toggle ke saath:
 - 📞 User se phone number lenge
 - 🗣️ Apna message choose kar sakta hai — ya default use kar le
 - 📍 Pickup wale mein: "Kitne km pe call chahiye?" — settings ka default ya trip-specific
-

5. Background Location Tracking – Chupke Chupke Kaam

Location tracking chalega bina user ko disturb kiye —

React Native + Background Location service se — bina battery drain, bina headache.

Agar app band bhi ho, location track hoti rahegi — aur destination paas aate hi call dhamake ke saath.

6. Call System – Twilio Baba Ka Jadoo

Twilio se:

- Automated voice call jayega
- Usmein wahi message jo tu chahta hai
- Sab kuch smooth, bina manual kuch kare

Tu chill kar, hum call karwa denge. Full guarantee.

Sample Use Case (Apni Kahani, Apni Zubaan Mein)

"Ravi local train mein Virar jaa raha tha. App mein destination set kiya.

Dost ko select kiya — 'Bhai, lene aaja 1 km pe call aa jaayega.'

Aur mummy ko bhi add kiya — 'Mummy, pahuch gaya toh call chale jaayega.'

App ne 1 km pe dost ko call kiya — 'Ravi 1 km door hai, ready ho jaa.'

Aur destination pe mummy ko call gaya — 'Main safely pahuch gaya hoon.'

Ravi bola — *"Yeh app toh zindagi hai bhai, travel bina tension ke."*

Tech Stack

- **React Native** – Frontend full power
 - **AsyncStorage** – Sab kuch phone ke andar, privacy bhi aur offline bhi
 - **Twilio API** – Calls ka magician
 - **React Native Background Location** – Bina dikhaye track karein, jaise CID
-

Final Thought – Ek Line Mein

"Tension lene ka nahi, app chalane ka. Tu bas travel kar, baaki hum sambhal lenge."
